

EYELASH AND EYEBROW TINT AFTERCARE

The following aftercare advice is essential to help reduce the risk of treatment complications, to improve your comfort/healing and to help achieve the best possible results from treatment.

Please follow the aftercare advice for eyelash and eyebrow tinting treatment.

- Keep brows and lashes clean and dry for 48 hours.
- Do not touch or rub the eyebrows or eyelashes for 24 hours after treatment.
- Do not apply make-up, creams or oils to the treatment area for at least 24 hours after. Oil bases makeup remover can cause tints to fade faster.
- Avoid using contact lenses for the rest of the day.
- Avoid swimming/ strenuous exercise for 24 hours.
- Avoid any extremes of temperature for 24 hours post treatment. e.g. hot showers, steam baths or saunas.
- Do not allow prolonged exposure to direct sunlight or sunbeds where possible, exposure can cause the tint to fade faster.
- Inform your practitioner if you are planning on having any further cosmetic eye or eyebrow treatments, they will advise when it is best to have this done.
- Results will start to fade after 4-6 weeks but this depends on the rate of growth of new hairs.
- Contact you practitioner as soon as possible if you notice any unwanted side effects following treatment.
- Any allergy symptoms to the tint dye such as red rash, swelling or if you feel unwell, you must seek urgent medical attention.
- Your practitioner will advise when further treatment appointments are required. If you are advised to attend a follow up appointment, please do make every effort to attend them. You should do this even if you believe that the recovery process is going well and you cannot see that there are any visible complications.

It is essential that you have read all of the information available.

Please do let your practitioner know if you have any questions or if you do not understand any of the aftercare instructions provided above.
